

Swinging cow brush improves herd health

The swinging cow brush, exclusively developed for DeLaval, is designed to improve cow health, comfort and welfare. The brush, which starts to rotate on contact, is a revolution in cow care and cow comfort. The unique brush which rotates at an animal friendly speed, swings freely in all directions, smoothly up, over and alongside the cow to provide comfort all around.

The DeLaval swinging cow brush has a patented unique design. It delivers a safe and efficient grooming for your cows.

Safe and efficient

The swinging cow brush not only reaches more parts of the cow's body than brushes which simply rotate, it also takes minimal barn space to operate in. Pre-mounted so it is easy to install, the cylindrical brush is suitable for wall or post installation. If it is installed in the right space in a loose housing barn it helps the flow of cow traffic, guiding cows from the feeding area to the resting area. Correctly placed, it stops cows from hurting themselves by scratching on the interior in the barn.

Hygienically easy

The exclusive design has safety built in as well, with overload protection against overheating and IP55 protection which enables the brush to be installed outside if desired. The energy saving automatic on/off feature starts the brush rotating on demand

and stops it within 10 seconds after use. The brush unit is easy to clean too, with high pressure-cleaners. This facilitates good barn hygiene.

The brushes have the right length and hardness to stimulate the blood circulation whilst helping the cow to keep clean and calm. Cows in good health produce more milk and with a DeLaval swinging cow brush you will make sure your cows have the best possible comfort conditions.

The hard wearing design gives a long term investment. The hinges are strong and durable to secure a safe and smooth swing over action.

All around cow comfort:

- Flexible to place on wall or post
- Low on energy consumption
- Easy to keep clean
- Suitable for 50 to 60 cows
- Promoting cow traffic

Technical facts:

- Rotating speed 22 rpm
- Automatic on/off
- IP55 protection
- Overload protection
- Brush unit with 18 cm long bristles

Technical details:

- Dimensions (LxWxH): 90x 90x 82 cm
- Average installation height from ground (underneath brush): 100 cm – 150 cm
- Diameter brush: 50 cm
- Width: 60 cm
- Weight: 35 kg
- Power: 0,06 kW
- Voltage: 915262 – 01 230 V AC
915262 – 02 110 V AC
